

Control Panels
Highest Quality, International

KARL MAYER

Control Panels – German manufacturing excellence for the world.

We offer a full range of services to meet your Control panel supply needs.

- Design, sourcing and assembly all from one professional supplier
- cost effective and reliable, meeting the latest standards.

To do this, we combine the advantages of being an international manufacturer with years of experience in building textile machines. We are the world leaders in building warp knitting and warp preparation machines. This enables you to benefit from the cost-effective manufacturing operations of our Chinese factory combined with German precision engineering management. A highly skilled team in China is responsible for carrying out all our logistics and sourcing activities.

All our manufacturing operations are subject to the same, strict quality standards expected in Germany, and the range of services which we offer are extremely flexible. We can supply fully assembled and tested control boxes as well as full plate mounted or sub assemblies for installation in your own OEM panels. We can also offer final assembly and testing services for these elements in our factory in Germany.

Our highly skilled engineers will support you throughout all planning and design stages. Sheet metal working? Mechanical processing? Painting? – No Problem! You will be impressed by the wide range of services which we have to offer.

How you can benefit

- Your contacts are based in Germany.
- You can communicate with us in English, German or Chinese
- You have access to our Chinese manufacturing facilities, which were extensively expanded in 2008.
- We can source cost effective parts for you on the Chinese market. You decide whether we use components produced by Chinese or non-Chinese manufacturers.
- If required, all the engineering work can be carried out in Germany.
- We control the complete logistics chain to and from China.
- We can keep transport costs low by regular consolidated shipments.

What we can offer

- Planning and electrical documentation using E-CAD system E³.series
- Flexibility in terms of order volumes – you will receive the same high level of service whether you order individual components or batches of 10,000 pieces
- High degree of flexibility in the scope of orders – complete commitment: both when producing a small distribution box or a control panel for the latest machine and plant manufacture
- You select the components
- Customer-specific order processing
- Traceability
- Commissioning
- Operational testing
- Parameterization of components

Factory in Obertshausen, established 1937

Quality

We at KARL MAYER are recognized as the world leaders for the supply of our products to our consistently high quality standards. Our Control Panel manufacturing department can give you the same high level of efficiency and performance in every respect. All our product-related procedures are carried out in accordance with strict testing and control specifications.

Control and monitoring of production

All production stages are checked and documented in accordance with specific test protocols.

We manufacture all our products in accordance with

VDE [Association for Electrical, Electronic & Information Technologies]

Factory specifications

UVV [Accident-Prevention Regulations]

BGV-A3 [Equipment Inspection]

Certificate of Quality issued by Wujin Chamber of Commerce

Electrical testing

All the wiring is fully electrically tested. If required, we can also carry out additional tests, such as resistance measurement, capacitor testing, etc. Whatever your cabling system, we can work with you to produce exactly the right test program, thus giving you complete peace of mind.

Traceability

We use our ERP system to produce full and complete records. The operating sequences, machinery, personnel and, of course, the primary materials and production data, can all be displayed and traced using barcodes or a data interface. This guarantees consistent reproducibility of all the key parameters.

Development, construction and documentation

Our engineers, designers and programmers can develop systems in several stages, which are totally tailored to suit your specifications. We will meet your technical requirements on the basis of the best cost:benefit ratio.

Production can be carried out to fully meet your specifications, alternatively our engineers can work with you to provide the production data for your particular product.

You can profit from our years of experience in building high-tech, high quality, cost effective machines, networking production facilities in different parts of the world to optimize your products.

Talk to us, let our know how be your advantage.

Norbert Burkard, our coordinator in the Control Panel department, will be happy to help with your project.
